Grenoble INP - UGA is a member of international engineering and management education and research networks. It is widely recognized in national and international rankings.

Grenoble INP - UGA is a renowned public institution of higher education and research, and a major player in the Grenoble ecosystem. It is the engineering and management institute of Grenoble Alpes University, and plays a leading role in the scientific and industrial community.

### Researcher in Thin Film deposition of functional materials by atomic layer deposition (ALD)

Grenoble INP - UGA is a leading public institution accredited with the French label “Initiative d’excellence”. It offers innovative engineering and management programs, with an increasing internationalization of its course offers. The courses are grounded in sound scientific knowledge and linked to digital, industrial, organizational, environmental and energy transitions. The Engineering and Management Institute of Grenoble Alpes brings together more than 1300 staff members (teacher-researchers, lecturers, administrative and technical staff) and 8300 students, located on 8 sites (Grenoble INP - Ense3, Grenoble INP - Ensimag, Grenoble INP - Esisar, Grenoble INP - Génie industriel GI, Grenoble INP - Pagora, Grenoble INP - Phelma, Polytech Grenoble, Grenoble IAE and the INP Prepa). Grenoble INP is also a highly-ranked institution of higher education and research, leading the way in the fields of engineering and management on an international scale. It is a member of a large number of international academic and research networks. It is part of the European University UNITE!.

As part of Grenoble Alpes University, Grenoble INP has associated guardianship of 39 national and international research laboratories and of technological platforms. The research conducted there benefits both its socio-economic partners and its students. Grenoble INP is at the heart of the following scientific fields: physics, energy, mechanics and materials; digital; micronanoelectronics, embedded systems; industry of the future, production systems, environment; management and business sciences.

Grenoble INP - UGA is an equal opportunity employer committed to sustainability. Grenoble INP-UGA celebrates diversity and equity and is committed to creating an inclusive environment for all employees. All qualified applications will be considered without discrimination of any kind.

---

**Research**

The candidate will mainly work at the LMGP, Materials and Physical Engineering Laboratory, in the SALD team within the FUNSURF group. The SALD team is a very dynamic group focusing on the development of functional thin films using scalable chemical vapour deposition approaches (see link). Materials of interest include oxides, metals and metallic nanowire networks for different applications including photovoltaics, sensors, antimicrobial coatings, encapsulation of devices, resistive switching, etc. Our activity and recent research outputs can be checked in the following link: sites.google.com/site/workdmr/. We have recently optimized the deposition of Cu$_2$O thin films with record mobility and conductivity using our SALD deposition system [Nature Communication materials 2021, J. Mater. Chem A 2021, Nature Communications 2022]. In the framework of an international France-Germany project, we plan to develop new oxides with superior optical/transport properties using new precursors synthesized in Ruhr-University Bochum (RUB). The materials developed will be integrated in functional devices such as photovoltaic cells and photoelectrochemical cells. Other applications will also be studied through both national and international (Germany, Spain, UK, Portugal, Canada) collaborations.

Located in the heart of an exceptional scientific environment, the LMGP offers the applicant a rewarding place to work. The laboratory is very dynamic and highly international. The PhD student will perform as well short stays in Germany (Bochum) in the framework of our French-German joint project. The candidate will have the possibility to supervise master students and perform teaching.

LMGP Web Site: [http://www.lmgp.grenoble-inp.fr/](http://www.lmgp.grenoble-inp.fr/)

**Job description**:

The candidate will focus on the optimization of the SALD deposition parameters and thorough characterization of the materials deposited. The candidate will also be involved in device fabrication and characterization and will have hands on experience on the synthesis of precursors in our partner’s lab in Bochum. The ideal candidate is a highly self-motivated individual of any nationality with a strong experimental background in semiconductor device physics and thin films.
Specific requirements or conditions

- PhD/master thesis in physics, chemistry, chemical engineering or materials science, preferably with a thesis related to thin films
- Experience in thin film deposition techniques (CVD, MOCVD, ALD, SALD, MBE)
- Experience in processing, developing and characterizing thin films via techniques such as XPS, AFM, KFM, electrical characterization and ellipsometry, XRR, XRD, TEM, SEM, SIMS,
- Have a solid understanding of physics of semiconductor devices
- Fast learner, hands on and have a flexible attitude
- Programming skills (labview/python/matlab/etc)
- 3D drawing and CAD design (Blender/Solid Works/Catia/Fusion 360 etc)
- Have experience in 3D printing
- Have experience in building and/or setting up laboratory equipment or simple systems (i.e. Arduino, etc.)
- Be someone able to and enjoy to solve problems and pushing your research to achieve results
- High degree of responsibility and independence, while collaborating with your team and lab mates, and other laboratory staff.
- Good management skills, good presentation skills, excellent written and oral English level (among non-native English speakers, equivalent TOEFL score of 100 or higher).

Proficiency in English is required. In addition, international experience will be a decisive asset.

Position assigned to a restricted area: NO

(Device for the protection of the scientific and technical potential of the nation, conditioning the appointment of the researcher to the authorization of the Defense Security Officer).

How to apply

Applications must be sent to: david.munoz-rojas@grenoble-inp.fr
Application deadline: 13/10/2023
